

UDACAPI

DIGITAL DATA COLLECTION AND
MONITORING SOLUTIONS

INTRODUCING UDACAPI

UDACAPI is an innovative data collection and monitoring system that provides clients with an easy-to-use approach to data collection and full transparency to track progress, monitor data, view descriptive statistics, and access raw data in real-time. UDACAPI uses ODK (Open Data Kit) and R statistical software for data collection, monitoring and analysis application.

The UDACAPI dashboard is intended to meet the individual needs of clients and can be tailored according to the client's needs. Additionally, when using UDACAPI, UDA Consulting provides free advisory services on sampling, data collection and data analysis.

DATA COLLECTION

Prepare online/offline digital surveys

Collect a wide range of data (GPS, photo, audio and more)

Reduce errors with skip logic, warnings and constraints

DATA MONITORING

View survey progress

Download raw data

Conduct data analysis

View maps and data visualizations

Collect geo-referenced data

Real-time data monitoring

Real-time data analysis

UDACAPI **ADVANTAGES**

UDACAPI offers clients a range of advantages over other CAPI and paper-based survey data collection tools.

High Quality Data Collection

- Permits multimedia data collection
- Supports automatic sample selection
- Mapping features to guide enumerators
- Daily control checks

Real-Time Monitoring

- Data submitted in real-time
- Fully integrated with GIS applications
- Track progress in real-time
- Automatically generated maps and statistics

Fully Customizable

- Custom survey development
- Customizable dashboard
- Compatible with desktop and mobile
- Download data in SPSS, STATA or Excel

Efficient

- Rapid development of surveys
- Faster data collection
- Fewer data entry errors
- Real-time data submission

Track progress in real-time

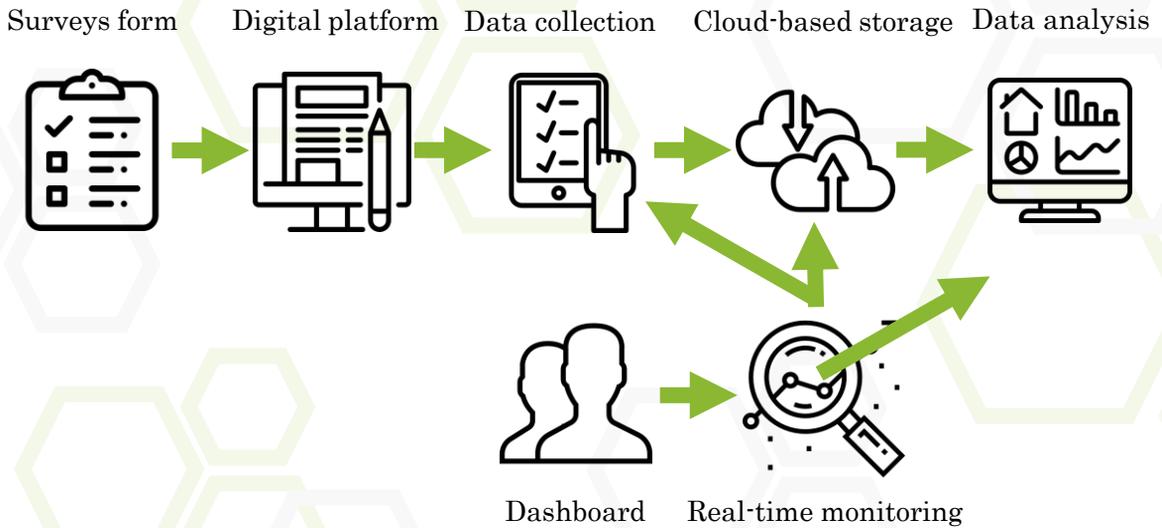

Fully transparent

Data security and privacy

UDACAPI PROCESS

30+

Countries where UDACAPI was deployed

100,000

Interviews conducted with UDACAPI to date

UDACAPI has been used for data collection and research projects conducted for the World Bank Group, UN agencies, the European Union, GIZ, IFRC, World Vision, ACTED, GOAL, Save the Children, Relief International and more
